

ICoTA Canada 2019 Roundtable Program – 23rd October

Metropolitan Centre 333-4th Ave SW, Calgary, Alberta

7:00	Registration & Buffet Breakfast
8:00	Opening Remarks – President ICoTA Canada
8:05	Optimizing milling & intervention using realtime data and diverting agents – Brad Watson (STEP Energy Services)
8:30	High resolution acoustic imaging – Stephen Robinson (Darkvision Technologies)
8:55	Driving completion efficiencies using sensor driven data – Chad van Buskirk (Cold Bore Technology)
9:20	A new coil conveyed reservoir evaluation technique – Dave Jellett (Pursuit Technologies)
9:45	Coffee Break & Exhibition (40 mins) – Sponsored by Global Tubing
10:25	Revisiting Extended Reach – Rob Standen (NCS Multistage)
10:50	New insights on CT friction reduction for wellbores with debris and for openhole wells- Epsa Sharma (Baker Hughes)
11:15	Pumping down a 2” CT string in a 3 mile horizontal well – John Yeung (Element Technical Services)
11:40	Using multiple variables to design and execute operations in extended reach wells – Kaveh Yekta (Essential Energy Services)
12:05	Group photograph for presenters only (by registration table)
12:05	Lunch & Exhibition
12:45	Keynote address – Vivian Krause
13:30	ICoTA Innovation Award – Michael Bosdet (TSGI)
13:35	Advancements in thermal rod interventions – John Taskinen (Snubco Group)
13:50	New and cost-effective method for isolating surface casing vent flows – David Yager (Winterhawk)
14:25	Novel velocity string method for restoring production in depleted wells – Epsa Sharma (Baker Hughes)
14:50	Coffee Break & Exhibition (25 mins) – Sponsored by Mobile Data Technologies
15:15	Next generation shear blades for high strength CT – Ryan Smith (Nexus Energy Technologies)
15:40	Recent experiences of CT drilling in severe sour environments – Bruce Reichert (Tenaris)
16:05	Innovative process to improve CT Operations– Yunhao Li (NOV)
16:30	Closing remarks – President ICoTA Canada
16:35	Cocktails & Exhibition
